

A red square with a white border. The word "ORIGAMI" is written in white capital letters in the center of the square.

ORIGAMI

Let's make
a paper balloon!!

We are going to use
"Yuzen Origami"

going to go up the
back of origami!!

**Fold it in half, and it
also fold in half.**

put it back together.
And we're going to
take the right end to
the other side.

And so we make
triangles.
do the same thing
on both sides.

And fold a triangle
on a dotted angle.

Also do the same
thing behind it.

And fold a triangle
on a dotted angle.

Also do the same
thing behind it.

And fold a triangle
on a dotted angle.

Also do the same
thing behind it.

And fold a triangle on a
dotted angle.

Also do the same thing
behind it.

And insert into the space
of origami

Also do the same thing
behind it.

**And blow breath in
from the direction of
the arrow.**

FINISH

NEXT

Let's make
a top!!

Please prepare
3 sheets of
origami paper.

Fold it one by
one!

Fold it into a triangle so
that the diagonally
opposite corners overlap.

Fold the diagonally
opposite corners of the
resulting triangle so that it
becomes a triangle again.

Open it.

Fold the four corners so
that they meet the
intersection of the folded
lines.

Fold it again so that the four corners overlap the center.

Once again, fold it so that the four corners overlap the center.

Turn it over.

Pinch the middle of all four
sides to make a cross.

The first part is
now complete!

Fold it into a triangle so that the diagonally opposite corners overlap.

Fold the diagonally opposite corners of the resulting triangle so that it becomes a triangle again.

Open it.

Fold the four corners so
that they meet the
intersection of the folded
lines.

Turn it over.

Fold it again so that the
four corners overlap the
center.

Turn it over again.

Once again, fold it so that the four corners overlap the center.

Fold back the four corners in the middle to fit the four corners on the outside.

The second part is now complete!

Fold it into a square so that
the facing edges overlap.

After unfolding, fold it so
that both ends overlap at
the center crease.

The edges are aligned with the center crease so that you can see the inside of the origami.

Fold the other half in the same way.

Holds one of the four protruding corners.

Open the top layer and flatten to make a square.

Do the same for the other three corners, making four squares.

Make a crease as shown in
the picture.

Open top layer and flatten
as below.

Spread out the four popped
out corners that have been
completed.

Then four corners are
gathered in the middle.

Open top layer and flatten
as below.

Spread out the four
popped out corners that
have been completed.

Then four corners are
gathered in the middle.

The last part is now
complete!

①

②

③

Insert the four corners of
① into the four pockets of
③ one by one.

Insert the four corners of
② into the four pockets of
① one by one.

Insert each of the four
isosceles triangles in ③ into
the gap under ②.
