

at a Glance

[Outline]

Osaka Kyoiku University (OKU), which was founded in May 1874 as a teacher training school, has 150 years history and tradition. The current number of undergraduate and graduate students totals approximately 4300, with another 4600 students matriculated in affiliated schools. Among Japanese universities, OKU is one of the leading producers of qualified teachers and large-scale colleges of education.

The main campus of OKU was established in the Kongo Ikoma Kisen National Park, in Kashiwara City, Osaka. This campus is approximately 670,000 square meters in area. In addition, OKU also has a campus in Tennoji.

The university's programs are designed to meet the high educational standards of a comprehensive teacher training university, which in the case of OKU is made up of 11 affiliated schools and 8 educational centers.

Affiliated Schools

Osaka Kyoiku University reformed the governance system and set up Supervisory Board as an organization to combine between the university and its affiliated schools in 2020. Nine affiliated schools including three elementary schools, three junior high schools, a multi-campus senior high school located in three different areas, a school of special needs education and a kindergarten are supervised by this board.

This board works on strengthening cooperation between the university and its affiliated schools as well as promoting their secure management, guidance, education, researches and school safety. Our affiliated schools make outstanding contributions to educational researches of the university and provide undergraduate students with the practicum teaching

experience. They also conduct their joint research in each area. They cooperate with each other and are closely connected through higher grade schools accepting students from lower grade schools.

< Tennoji area >

Literacy education to harmonize human being and science

< Ikeda area >

Fostering leaners' competency to create a global society collaboratively

< Hirano area >

Curriculum implementation and educational evaluation aimed at developing each child as a creator of a new society

Center Introduction

National Center for School Safety Promotion

23 pupils and teachers were murdered or injured on June 8, 2001 in Ikeda Elementary School attached to Osaka Kyoiku University. Long term treatment has therefore been vital for emotionally damaged pupils, their parents, and teachers.

The center supports special methods to handle crisis in schools like the case above, carries out research on risk management in schools, and it is accessible to all researchers in this field.

Center for Supporting Teacher Professional Development

We guide and support students who are aiming to obtain a teaching license in their practical activities, such as reflective activities towards teaching and teaching practicums. Furthermore, we plan and review classes related to diversity education in the undergraduate program to contribute to the cultivation of teachers capable of promoting diversity education in schools. Moreover, to enhance the professional development of in-service teachers, we collaborate with other universities and boards of education to develop e-learning content for teacher training.

Health Care Center

Health Care Center provides various health-related information. The center places special emphasis on offering assistance that enhances the students' as well as faculty's health.

Center for Global Education and Research

While the center provides services with the objectives of expanding teacher education by cooperating with other educational/research institutes both domestic and overseas, it also aims to advance human resource development, meeting a demand of globalized society.

Center for Information and Communication Technology

The objective of the Center for Information and Communication Technology is to contribute to the development of educational research by promoting the computerization and smoothly operating the information system as the on-campus common-use facility.

Collaborative Innovation Center for Industry, Government and Academia

This center aims to produce "innovation for education" by integrating resources from universities, industries, and government agencies. Additionally, the center manages scientific equipment at Osaka-Kyoiku University, trains elementary and secondary school teachers in science and technology, and revitalizes science and technology education in schools and communities.

Career Support Center

The objective of the Career Support Center is to support Osaka Kyoiku University students to build their career paths, choose professions, and to plan their course after graduation. The Career Support Center in collaboration with the academic advisor, gives advice and support suited for each students' aptitude and their plan after graduation.

Study Support Center

We provide consultation to students, offer study support for students with disabilities and other students' support.
